

EARTH FRIENDLY PRODUCTS PROLINE

DYE FACTS

DYES

SYNTHETIC DYES - Synthetic dyes are created through chemistry and chemical compounding. They are used in cleaning chemicals, cosmetics, and food products.

CARCINOGENS AND DYES - Artificial colors and dyes are made primarily from petroleum by-products and coal tar (a carcinogenic liquid or semi-liquid from bituminous coal).

HAZARDOUS INGREDIENTS - Coal tars can contain benzene, xylene, naphthalene, phenol, and creosol.

- BENZENE is a known human carcinogen.
- NAPHTHALENE has been linked to cancer in animal tests and exposure to large amounts may damage or destroy red blood cells.
- NITROBENZENE can irritate eyes and skin at low exposure levels and has damaged the liver and blood in animals in higher amounts.

MSDS LISTING - Manufacturers are not required to list the specific type of dye used in the product.

DYE-FREE EARTH FRIENDLY PRODUCTS

No dyes. Period.

Zero VOC emission.

Improved indoor air quality.

Made with 100% sustainable, plant-based ingredients. Manufactured, packaged, and shipped according to highest environmental standards throughout entire production and delivery process.

Just read our label and see why facilities of all types are turning to Earth Friendly Products.

Final Word: Earth Friendly Products contain no dyes that can contain hazardous ingredients.

EFP ENVIRONMENTAL BENEFITS

- 100% sustainable, plant-based ingredients
- Made with certified USDA National Organic Program essential oils
- Free of phosphates, formaldehyde, petrochemicals, dyes, chlorine, synthetic perfumes, ammonia, GMOs (genetically modified organisms), caustic ingredients
- Greywater / septic-safe
- Non-toxic, biodegradable, neutral pH formulations
- Optimum product efficacy ensured by 20+ years of plant-based formulation and manufacturing experience
